LUBECON[®] BRINGS SOLUTIONS

PRECISE AND CONTROLLED LUBRICATION OF VITAL, MOVING PARTS IS THE ONLY WAY TO MAXIMIZE CONVEYOR LIFE AND MINIMIZE MAINTENANCE COSTS.

- Castrol LubeCon's central systems utilize heavy duty pump & motor combinations for reliability and solid performance.
- Each central system can feed multiple lubrication units while allowing the customer to monitor low level, power & pressure faults.
- Fully automated operation takes the worry out of chain lubrication schedules and ensures your chain is lubricated on time, everytime.
- Central systems come in 55 and 12 gallon tank sizes to fit your specific needs.
- All central systems are available with either a power supply to feed multiple lubrication units or an Advanced System Controller.

PERFORMANCE SPOTLIGHT

- 1/2hp 120VAC or 220VAC TEFC industrial motor with thermal overload and automatic reset protection ensures a long maintenance free motor life.
- Multiple tank and system configurations allow you to select the right central system for your application.
- Heavy lube central systems can pump lubricant viscosities up to 1000 SuS
- 55 gal or 12 gal reservoirs
- Low level sensor with automatic pump shutdown
- Easy to see power, pump, low level, and pressure fault output lights.
- PLC monitoring for power, pump, and system faults.

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.
